Dear Lily:

Thanks for meeting with me before you even started. That let me know that the community is priority for you and I appreciate that. I said I would pass on a couple of old files on HP CI that indicate concerns voiced by the community at that time and most of which are still current. The big ticket items over the years are exposure to dust (asbestos, etc.); community believes the base is still highly toxic due to misinformation given; contract opportunities and entry level jobs on the base, how clean is clean, etc. Over the years the Navy has consistently given only 2% of the contract opportunities to the locals zip codes, which usually translate into truckers hired to haul waste and soil. One to two people from the community were hired by the Navy's contractors and may still be employed. We've had 4-5 entry level job graduates (SuperJTI and/or NIEHS minority worker trainings) for the site in the past.

Attached is a HP briefing package and overview that was developed for Mathy's 2010 visit with more information. Also, I included an excel file of contacts and highlighted folks in yellow that you may want to contact at some point. I would be happy to go with you.

We can talk further on all of this. FYI,

Jackie
